GETTING IT DONE TOGETHER

The PutterWheel can be customized for corporate gifts, premiums, golf outings and more.

They are not easily lost like logo'd golf balls and make a lasting impression with your client and their friends when taken to the practice green.

The product is unique, with premium packaging and your custom logo.

Both sides of the PutterWheel can be fitted with your logo, design or copy as in the above example.

*"...a new putting aid that could become one of the best and most innovative products to come along in a long while...it's small and easily portable. It's a good price point. And I really think it's going to make me a better putter."*

– PGA.com

*"With the PutterWheel my students learn quickly to get their eyes over the line of the putt. From this setup they can make a better stroke and the wheel wobbles less."*

– John O'Leary  
Director of Instruction  
Bay Hill Golf Academy

# PUTTERWHEEL

# PutterWheel S3 System

The PutterWheel is a unique wheel shaped putting training aid that helps golfers improve line of sight, setup and provide instant feedback on mis-hits by wobbling off the clubface.

## 1. Line of SIGHT

The PutterWheel's patent pending wheel design encourages taking dead aim at your target. Even standing above the ball, you will be able to tell if you are on or off line. The narrow width builds confidence and focused aim.

## 2. SETUP

The PutterWheel not only helps align your body to the ball, but the distance as well. The PutterWheel's red sidewalls tell you if you are too far or too close to the ball. (fig. 1 - 3)

## 3. STROKE

With confidence in your line and setup, the stroke becomes simpler. Make a rolling stroke as you would to get a wheel rolling. If your stroke is not square to the direction of the PutterWheel, it immediately tells you by wobbling off the club face. (fig. 4)

Fig. 1. See red inner ring, standing too far from the ball.

Fig. 2. See red outer ring, standing too close to the ball.

Fig. 3. See just white top, just right! Your eyes are directly over the ball.

Fig. 4. A mis-hit of the PutterWheel will cause it to wobble off the club face.

# The Details...

The patent pending system comes with 3 PutterWheels, a storage pouch, and an alignment tool that draws 2 lines on your game ball so that you can take your visualization of "rolling the wheel" to the course!

- 3-PutterWheel Package** — ideal for holiday gifts, customer appreciation gifts, corporate events, employee incentives and golf outings.
- Dual PutterWheel System** — perfect for lead generation or moving qualified leads down the sales funnel.
- Single PutterWheel System** — great for trade shows & conferences as a give away.
